I am a highly motivated and dedicated professional known for my exceptional problem-solving skills. With a deep and comprehensive understanding of React, I bring a wealth of knowledge and expertise to any development project. My unwavering enthusiasm for tackling challenges drives me to constantly seek new opportunities to contribute and excel. Eager to assist and make a meaningful impact, I am committed to leveraging my skills and passion to drive the success of projects and deliver outstanding results.

Core Skills

Languages: Javascript, Typescript, Python, Java, Php

Frontend: React, Next, React Native, Expo, Tailwind, Material, Bootstrap, Styled Components, Sass, D3, Shopify, Three.js, Tanstack, Redux, Mobx, CRA, Vite, Wordpress, React Router, Playwright, Axios

Backend: Express, Flask, MongoDB, Postgres, MySql, Docker, Redis, RabbitMQ, opencv, Cors, SocketIO, LLM

Architecture: Microservices, Microfrontends, MonoRepo, Babel, NPM, Webpack, Firebase, AWS, Prettier

Work Experience

Fullstack Engineer
4AG Robotics

Mar 2025 - Feb 2026

I designed, architected, and built scalable web features and core platform components for the 4AG new web portal to their mushroom picking robots.

- I designed and implemented a records type system and standardized client-server communication protocols to ensure consistent, reliable data exchange across the platform.
- I built a comprehensive help center with an integrated smart search system to deliver fast, intuitive access to documentation and support resources.
- I designed and implemented a scalable notification system to deliver real-time alerts and updates across the platform.

Senior Fullstack Developer
MMHG INC

Jan 2021 - Dec 2024

I lead the team that built new features for web projects. Recruited and mentored my team. Worked with design and backend teams to organize project timelines.

- Created dynamic and responsive web applications using Typescript, React, enhancing the overall user experience
- Maintained complex WordPress websites as part of a dynamic software engineering team

- Implemented and optimized data visualization features using d3.js in various web application projects

Team Lead
What About IT

Jan 2020 - Dec 2021

I volunteered to lead the creation of their web profile, initiating the project from scratch. I recruited team members from the What About It community, established project milestones, and successfully developed the website to enhance their online presence.

- In the role of Team Lead, supervised cross-functional teams to deliver high quality software products within set deadlines
- Utilized Javascript, Python, and React to develop user-friendly applications while collaborating in a team setting as a Software Engineer.
- Gained experience in designing, building, and maintaining the continuous integration and delivery pipelines using AWS and Docker technologies

Engineering Surveyor
Various

Jan 2010 - Dec 2019

Lead teams of varying sizes on a range of projects, coordinating with clients to manage timelines, project resources, and deliverables. I also organized contractors and ensured that all work adhered to project specifications and quality standards.

- As a Crew Chief in Land Surveying my duties were to, streamline communication, improve workflow, and enhance overall performance.
- Reviewed plans to ensure the project is achievable within specifications, the designated timeframe and available resources.

Education

Mount Royal University
Bachelor of Computer Science

Sept 2016 - April 2020

SAIT
Diploma | Geomatics Technologist

Sep 2012 - Apr 2014
